With competitive pressures building up on business, the needs of IT are now going beyond technology. Businesses today need a computing infrastructure that will adapt itself to changing needs. Hence consolidation, virtualization and automation coupled with simplicity are becoming increasingly important.

We bring to you the state-of-the-art technology solutions based on open standards, virtually unlimited scalability and flexibility so that a solution implemented today will continue supporting your changing business needs in the future, thus offering you a lower TCO, faster ROI and above all, peace of mind.

## ➔ Our Enterprise Solutions Offerings

## ➔ Computing Solutions

- **Server Consolidation Solutions** – Based on HP Blade Servers and Itanium Servers, by using VmWare or UNIX based virtualization techniques, we can now do much more with much lesser number of servers.
- **64 bit computing Solutions** – Based on HP servers using Opteron and Itanium processors. For 64 bit Windows and Unix based applications you can now harness the performance and versatility of Itanium CPUs and sheer computing power of Opteron.
- **High Availability Solutions** – We can now enable high availability and failover at lower costs by using VMWare, Legato and Veritas

## ➔ Storage Solutions

- **SAN and NAS Solutions** – Based on HP virtualization technology, SAN solutions from HP provide unmatched flexibility and functionality. Storage solutions from EMC built around the philosophy of Information Lifecycle Management bring to the table top of the class performance and reliability.
- **Enterprise Backup Solutions** – Using Automated backup devices from HP along with the functionality delivered by backup software's from Veritas and EMC, we can now backup and restore any piece of data lying anywhere in the enterprise automatically.

## ➔ Application Based Solutions

- **Archival Solutions** – Applications that generate and process a lot of data slow down over a period of time. By archiving old infrequently used data using solutions from EMC and Veritas, you can now enhance application response time and reduce data storage and transmission costs.

Beyond System Integration  
*We offer Peace of mind*

Visit [www.skinternational.com](http://www.skinternational.com)

- **Performance enhancement Solutions** – Application performance is a function of multiple elements. Using technologies from VmWare, Veritas and HP, we can now monitor application behaviour to identify and resolve performance bottlenecks.
- **Disaster Recovery and Business Continuity Solutions** – Since businesses depend on data availability and the ability to take intelligent decisions based on the data, it is necessary that both the data and the applications needs to be available to the correct people across the enterprise on a 24x7 basis. Comprehensive solutions from HP, EMC and Veritas enable you to achieve just that. Our DR and BCP planning service helps you to structure your DR in the most cost effective manner.

➔ **The clear business benefits from all our solutions are**

- reduced procurement and management costs due to lesser consolidated servers,
- more flexibility, higher agility and adaptiveness to changing business requirements,
- near zero downtimes due to high availability solutions.
- faster time to restore, lesser errors due to automation and simplicity
- better utilization of the data,
- lower cost of storage, backup and overall information management.
- lower TCO and faster ROI

Host of these Services already Delivered to SAP India, CISCO India, HDFC Bank, ING Bank, ABN Amro Bank, Reuters, Persistent Systems, Zensar, HSBC Development Center, Persistent Systems, Intervet Labs, Intelenet Global Services , Garware etc.

HP	Intel Servers, Itanium Servers, Enterprise Virtual Array Storage solutions, NAS, Backup solutions, DR and BCP solutions
EMC	Storage solutions for SAN, NAS, Backup, Archival and Compliance related solutions, DR and BCP solutions
Veritas	Backup software, Application performance management software, Archival software, Replication software
Sun	Sparc and Opteron Servers

If you thought S.K.International would satisfy your Computing and Storage needs alone, please read further

➔ **Also on Offer from S.K.International**

- High Performance Technical Computing Solutions
- Networking and Security solutions
- Personal computing and enterprise printing solutions
- Facility Management, AMC Services
- Customized Software Development
